Remote Learning!

During remote learning, we will be setting out learning just as we do in school. Every day there will be a message from your teacher alongside a visual timetable which outlines the learning for that day.

Every day you will be receiving Maths, English and reading along with spellings, VIPERS and TT Rockstars. In addition to this, there will be a number of different curriculum activities such as RE, Computing, DT, PE, PSHE/SMSC and much more.

We have tried to keep the timetable as similar to the normal school day as possible. It is extremely important that you complete this learning and try your very best. Please don't worry if there is something you are not sure of. You can message us during the morning and we can try our best to support you.

Book recommendation

Poetry

Now is a great time to expand your poetry knowledge and listen to some poets reading you their favourite poems. Click on the link below to take you to a poet names Michael Rosen. There are plenty to chose from!

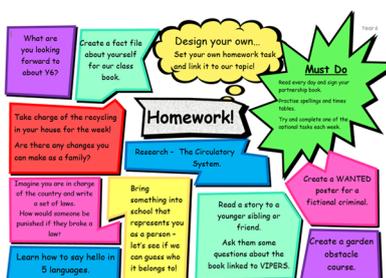

<https://www.michaelrosen.co.uk/videos/>

You could also dig out some of your own, your parents or your siblings' poetry books and read some in a quiet place... or if you are feeling really brave, you could practice them and perform them to your family like a performance!

Homework

A homework menu will be provided each half term which can found on our class page. These tasks will cover a range of skills.

Children can choose as many additional tasks as they like to fit in with their busy schedules at home.

English

During our remote learning, we will be completing lots of tasks that will lead up to writing a newspaper report.

We will be looking at the features of a newspaper, dialogue, sentence starters and tense. The newspaper report will be following the Spiderman theme but will be based on a new stimulus.

We will be following the writing process by exploring some of the key grammatical and structural features of other genres. We will then be generating our own ideas before planning and writing.

Maths

This half term, we will be continuing to learn about multiplication and division. We will also be building our knowledge from Year 4 about perimeter and area and fractions.

In multiplication and division we will be recapping how to multiply two and three digit numbers by a one digit number.

We will then move on to learn how to multiply four digit numbers by one digit numbers. This will help us as we learn how to multiply 2 digit numbers by 2 digit numbers using a formal written method. For division, we will be dividing up for four-digit numbers by one and learning how to interpret remainders.

In Perimeter and Area we will be recapping how to calculate these and to compare area and perimeters of shapes. For fractions, we will be learning how to read, write, order and compare fractions. In Year 5 we will be looking how to do this with fractions with different denominators.

Please continue to practice TT Rockstars at home!

Maths Vocabulary

Multiplication
Division
Remainder
Forma Method
Long Multiplication

Area
Perimeter
Covers
Square centimetre (cm²)
Square metre (m²)
Square millimetres (mm²)

Numerator
Denominator
Mixed Number
Improper fraction
Multiple
Equivalent

Partnership Books

Children are encouraged to read at home every day and to make a note in their partnership book every time they read. Record your daily read on ClassDojo using the tutorial on Class Story to help you do this.

Please continue to do this, as this will be monitored when we get back into the classroom. After every 20 reads, they will get one step closer to space and will be rewarded with a token which they can 'spend' on prizes and, of course, books!

Spellings

All children will be given spelling words to learn each **Friday**.

These should be practised as often as possible using the look, cover, check method.

Have a pen and paper ready for the spelling lessons.

PE

Our PE days will be on a **Thursday** and **Friday** this half term. We shall be focussing on gymnastics, performing different balances, jumps and putting these skills into a number of sequences.

During your brain breaks, you may also wish to exercise. You may want to do a Joe Wicks workout which will keep you fit and healthy during this lockdown.

Ensure you keep your heart rate up whilst exercising but the most important part is to have fun!

We look forward to seeing you all again soon and working alongside you and your family.

Miss Cartwright and Miss Cosway
